

## CHALLENGE

- Static and dynamic data masking to be performed only on the database, but also for PSFT pages and queries
- Complex conditional masking rules which ensured role-based data access
- Maintain high performance of the IT systems

## DRIVERS

- Comprehensive sensitive data discovery, Static Data Masking and Dynamic Data Masking solutions for PeopleSoft application.
- Data access must be user and role specific.
- Solution must be compatible with IBM managed IT systems.

## MENTIS SOLUTION

- MENTIS solution found all sensitive data.
- Successful implementation of Dynamic Data Masking with complex conditional rules to meet union and non-union requirements.
- MENTIS solution successfully rolled out by MENTIS and managed by IBM.

## SUCCESS STORIES

- Successfully implemented complex masking rules
