

A PRIVATE BANK IN DR

CHALLENGE

- The major requirement was to have a monitoring solution as a service. With a total of 62 requirements, 5 major requirements were –
- Support for multiple data sources (Db2 on AS400, Oracle, SQL etc.)
 - Support for agent based or proxy-based approach
 - Field-specific alerts and monitoring
 - Data based monitoring

DRIVERS

- Insider threat and access management.

MENTIS SOLUTION

- Using iDiscover, MENTIS found sensitive data in locations the client was not aware of since years and considered it impossible to find out.
- The data classifications from the discovery process were the base for the iMonitor solution
- Comprehensive monitoring for sensitive information and basic monitoring for the rest.

SUCCESS STORIES

They were evaluating 3 vendors namely IBM, Imperva and MENTIS, and MENTIS was shortlisted.

Our discovery and monitoring solutions together was praised by the customer. According to them no one else in the market could discover the amount of sensitive data so precisely and accurately.
