

TOP COMMERCIAL BANK IN UAE

CHALLENGE

- Cover the enterprise databases both Oracle and SQL Server. Consistency of data masking across both these data sources.

DRIVERS

- Best Practice

MENTIS SOLUTION

- Discovered sensitive card data of customers in all places (security team members were not aware of these places like unvalidated text fields and composite columns) and masked them.
- The consistency in masking was ensured by our comprehensive discovery solution in place.

SUCCESS STORIES

- Discovered sensitive data in locations the client was unaware of, like composite columns and text fields
