

LEADING HEALTHCARE COMPANY (US)

CHALLENGE

- Fully automated and easy to use data masking solution
- Oracle DM solution was changing number columns, which caused errors. If there was a mid-process error, the oracle DM would not restart automatically.
- Oracle DM tool was highly complex, requiring expertise.

DRIVERS

- Previous tool went wrong

MENTIS SOLUTION

- The DBA found that MENTIS iScramble™ is a fully automated process that did not require additional code.
- If there was a mid-process error, the MENTIS solution was able to re-start easily with no additional manual effort. The MENTIS Platform also required less time from their DBA: 5 minutes and no monitoring needed.
- MENTIS did not require additional disk space.

SUCCESS STORIES

- The organization noted several advantages to using the MENTIS Platform instead of Oracle DM.
