

MANUFACTURER OF ELECTRIC MOTORS

CHALLENGE

- Client was adding/deleting masked and unmasked users daily.
- Large table size

DRIVERS

- Increase performance
- Reduce static data masking time

MENTIS SOLUTION

- Discovery of sensitive data, Static data masking (synchronized process on loop to address users being added daily), Dynamic data masking (based on user access)

SUCCESS STORIES

- Instead of scrambling actual data, scrambled connection column to it, thereby increasing performance and speed
- Creating synchronized process for scrambling for users being added on an ad hoc basis
